

Our corporate **profile**

Why we're here

At SCE our purpose is simple. We're here to help our customers get the most value from their processes and materials – to help them get more from less, and to reduce their waste and environmental impacts.

Since 1961 we've been a family-owned company with true grit at our core. We know the value of reliability, and it's something we demonstrate every day through our strong relationship focus, commitment to deliver what we promise, and the highest safety and quality standards.

Our focus on efficiency is driven through all parts of our business. We're always looking for smart new ways to reduce waste and environmental impact. With resources becoming more precious and waste more costly, our innovation focus is on getting the maximum value out of your materials.

This includes introducing new industrial technologies, innovative material recycling and well-designed service delivery to drive safety and reduce environmental impact.

How we're different

SCE has evolved into a world class business through our:

- **Entrepreneurial approach**
- **Breadth and depth of expertise**
- **Strong quality management and**
- **Committed people**

It's not always easy or glamorous work, but we take pride in getting our hands dirty to make a material difference to your business.

"We're champions of innovation. By constantly working on research and development, we're able to make sure you're always getting the best possible products"

1961

Today

Our services

SCE offers flexible and tailored services for our customer needs in the industrial, manufacturing, agriculture, waste, building and construction and mining sectors.

Materials & Recycling

We unlock value by transforming industrial and construction industry by-products into superior construction materials.

Sydney Soil Solutions

We offer a less complex way of removing or receiving excavated materials and soils on site.

Hebden Quarries

We manufacture quality natural products for civil construction and mining applications.

Steel Services

We are experts in on-site services, by-product processing and recycling, total scrap management, logistics, metal recovery, refractory removal, slag processing and marketing.

Industrial Services

We're always looking for smart ways to reduce waste and environmental impacts, providing specialist on-site solutions across a broad range of manufacturing sectors.

Mining Services

We have a wealth of experience in all facets of the mining services industry from stockpile management to emplacement services.

Transport & Logistics

From port to warehouse, and farm to factory, there's nothing we can't transport, handle and store to make your business run more efficiently.

A company you can trust

We are resourceful and entrepreneurial, always creating opportunities, setting standards and looking for ways to break new ground.

We don't just talk the talk, we focus on delivering tangible results, doing the best job for our customers, every time.

We take pride in the value we add, we won't rest until we've contributed measurable change for the better.

We comply with all EPA regulations, while our ISO accreditation means we're a company you can trust. SCE is accredited to:

- ISO 9001: Quality Management Systems
- ISO 14001: Environmental Management Systems
- AS/NZS 4801: OH&S Management Systems
