

Our expertise: Pumps

Southern Pumping are your go-to when you:

1

Are facing uncertainty on the best way forward with regards to pumping

PUMP Ideation

As soon as you have an issue, contact us. Before you even realise you need a pump, if you're looking to move or suppress a liquid or gas, Southern Pumping have the expertise to advise on the most efficient processes.

When a mine site discovered its fire suppression systems were outdated, they called Southern Pumping. Our design team worked with the workshop team to build pumpsets that met both the current Australian Standards for fire pumps, and the stringent localised mine equipment requirements for the particular site.

2

Have a specific need with regards to pumping

PUMP Parts and Service

Our wholesale sales team have you covered for any pumping scenario. Brand agnostic, we only recommend the most suitable parts for your pumping needs. We also have an on-site workshop that can fabricate custom componentry as required.

3

Would benefit from knowledgeable input with regards to pumping

PUMP Knowledge

With 50 years experience in pumping, Southern Pumping can add value and support to any part, or across the whole end-to-end pumping process.

4

Are bound by complex standards with regards to pumping

PUMP Compliance

Having dealt with many Tier 1 clients across defence, mining, construction and other industries, Southern Pumping is well versed as ensuring adherence to legislative, organisational and site specific compliance parameters.

About us

Southern Pumping, an Australian-owned company established in 1974, takes pride in its role as a premier supplier of end-to-end pump solutions, supplies, and products.

With a remarkable 50-year history and an annual turnover of \$8.5 million, we have become a trusted name in the industry from Tier 1 firms to pump operators to individual tradesmen.

At Southern Pumping, we are not just a supplier; we are a dynamic organization committed to excellence and innovation. Our capabilities extend to expert advice, the design, manufacture, and supply of high-quality pumps and systems.

Southern Pumping is equipped to address any industry, any pump, and any issue, demonstrating our versatility and expertise. We offer consultation and solution ideation, full-service maintenance of pump systems, sourcing and distribution of specialized pump componentry, and perform fabrication, machining, and repairs in our own workshop. As the home of **Numbat**, **Acequip**, **Maxaflex** and **Blue Select** products, we know the importance of reliable systems and equipment backed by servicing you can count on.

Southern Pumping is your partner for all things pumping.

Pumps for mining

Southern Pumping brings extensive expertise to diverse mining applications, spanning coal mines, underground operations, zinc mining, open-cut mining, sand and gravel quarries, and more. Our array of tailored pumps caters to the unique demands of each mining scenario.

Selecting pumps for mining is a specialized process, as no two pumps are identical in this field. Our meticulous approach considers crucial factors such as required discharge head/pressure, suction conditions, fluid type, fluid temperature, available power, spare parts availability, ease of service, and other site-specific requirements.

Southern Pumping conduct thorough assessments to precisely match the right pump to your mining site.

CASE STUDY

South 32

Since the commissioning of South32's underground Dendrobium coal mine in 2002, Southern Pumping has been a trusted partner.

Supplying a variety of pumps, from centrifugal to helical rotor to air operated diaphragm pumps, Southern Pumping were the expert they called on when they needed a pair of new 110kW Hydro Titan centrifugal pumpsets. Once again our work went beyond simple supply, with the mounting and alignment on heavy duty galvanized steel skids, and delivery of special valves and pipework components tailored to site requirements.

CASE STUDY

Bluescope Steel

Southern Pumping has a long history with the **Port Kembla Steelworks** for approximately four decades. We are proud to have been the go-to supplier of pumps and accessories for Bluescope.

In addition to specialized pump overhauls on demand, we have also provided many custom process-related pump systems. Our deep knowledge of the various Bluescope sites, along with our detailed compliance to site access rules, has meant we have been able to rapidly assist in order to avoid costly downtime.

Pumps for industry

Southern Pumping boasts extensive experience across a wide spectrum of industrial pump applications.

These encompass manufacturing plants, sewage and waste facilities, chemical handling operations, dust suppression, pharmaceutical production, and more. Our diverse pump options are tailored to meet the unique demands of industrial settings.

Selecting industrial pumps is a specialized task, with each pump serving a specific duty and application. Given the uniqueness of each scenario, factors such as required discharge head/pressure, suction conditions, fluid type, fluid temperature, available power, spare parts availability, ease of service, and other site-specific requirements are carefully considered. Southern Pumping invest exhaustive efforts and assessments to comprehend site requirements and deliver precisely the right pump.

Pumps for construction

Southern Pumping's wealth of experience extends to all four construction sectors (residential, commercial, industrial, and infrastructure).

These include high-rise apartments, shopping precincts, public works developments, and water infrastructure projects. Our range of tailored pumps offers versatile solutions for the dynamic demands of the construction industry.

Selecting pumps for construction involves a specialized approach, recognizing the uniqueness of each project. Factors such as required discharge head/pressure, suction conditions, fluid type, fluid temperature, available power, spare parts availability, ease of service, and other site-specific requirements are carefully considered. Southern Pumping conduct exhaustive assessments to gain a deep understanding of site requirements and deliver precisely the right pump for your construction project.

CASE STUDY

Sydney Water

Sydney WATER

Amid the Covid-19 lockdown, Sydney Water acknowledged Southern Pumping as an Essential Services provider, enabling us to support critical infrastructure. With a long-standing history with Sydney Water, we successfully passed rigorous compliance audits, leading to expanded contracts for new regions.

Our offerings include submersible pumps, process pumps, dosing systems, fire protection, hot water circulation, spare parts, and reliable backup service. Frequently called for on-site pump inspections, we swiftly source and deliver urgent equipment, often surpassing OEM suppliers' lead times.

Southern Pumping

Any pump type

- ✓ Centrifugal Pumps
- ✓ Helical Rotor Pumps
- ✓ Submersible Pumps
- ✓ Air Operated Diaphragm Pumps
- ✓ Metering or Dosing Pumps
- ✓ Peristaltic Pumps
- ✓ Lobe Pumps
- ✓ Magnetic Drive Pumps
- ✓ Gear Pumps
- ✓ Slurry Pumps
- ✓ Vertical Multistage Pumps
- ✓ Stormwater pump systems
- ✓ Sewage pump systems
- ✓ Pressure booster pumpsets
- ✓ Hot water circulation pumpsets
- ✓ Pollution control equipment
- ✓ Fire services pumpsets
- ✓ Filtration

Any pump or part

Our brands

Exclusive distributors of

Other brands we work with

Grundfos, Southern Cross, Ebara, Lowara, Mono, Roto, Orbit, Seepex, Prominent, Davey, Onga, Pentair, Dab, Sulzer, ASM, Flygt, ITT, Verderflex, Zenit, Tsurumi, Wilo, Wilden, Graco, Sandpiper, Versamatic, Thompson Kelly & Lewis, Franklin, LMI, ABS, Hydra Cell, Hidrostal, GVR Pompe, Telby and more

Any pump issue

- ✓ Full workshop facilities for pump repairs and fabrication
- ✓ Mobile onsite service units
- ✓ Pump hire options
- ✓ Pump system design and consulting
- ✓ Direct sales of almost any brand and a large inventory of spares and crucial components and related products for industrial pumps
- ✓ Laser alignment
- ✓ Site audits
